

Standard Declaration

For associate members of the Poseidon Principles

We, _____
(name of FINANCIAL INSTITUTION), recognise the urgent action necessary to align greenhouse gas emissions with globally recognised goals to avoid the worst impacts of climate change. We recognise that all maritime industry participants must play a role in addressing the sector's contributions to global greenhouse gas emissions. Moreover, we recognise that by supporting the financial sector and joining other financial institutions in becoming an associate member to the Poseidon Principles, we are accepting our important role in promoting responsible environmental stewardship throughout the maritime value chain. This offers significant benefits to us as part of this value chain, to the global maritime industry, and to society as a whole.

Therefore, _____
(name of FINANCIAL INSTITUTION) commits to:

- Publicly recognise that we are an associate member of the Poseidon Principles;
- Encourage and support other financial institutions to join us and to support them in becoming signatories to the Poseidon Principles; and
- Share the approach developed by the Poseidon Principles in relevant shipping and financial forums.

By signing this letter, _____
(name of FINANCIAL INSTITUTION) agrees to pay the sign-on and annual fees and commits to supporting the Poseidon Principles, as outlined in the Technical Guidance and Governance Rules.
