

Standard Declaration

For signatories to the Poseidon Principles

We, _____
(name of FINANCIAL INSTITUTION), recognise the urgent action necessary to align greenhouse gas emissions with globally recognised goals to avoid the worst impacts of climate change. We recognise that all maritime industry participants must play a role in addressing the sector's contributions to global greenhouse gas emissions. However, we also recognise that by joining other financial institutions in becoming a signatory to the Poseidon Principles, we are accepting our important role in promoting responsible environmental stewardship throughout the maritime value chain. This offers significant benefits to us as a signatory, to the global maritime industry, and to society as a whole.

Therefore, _____
(name of FINANCIAL INSTITUTION) commits to:

- Publicly recognise that we are a signatory of the Poseidon Principles;
- Fully implement the Poseidon Principles throughout our ship finance practices, including the assessment and disclosure of the climate alignment of our ship finance portfolio;
- Participate in the governance of the Poseidon Principles and to ensure that they remain relevant and robust into the future;
- Encourage and support other financial institutions in becoming signatories to the Poseidon Principles; and
- Share the approach developed by the Poseidon Principles in relevant shipping and financial forums.

By signing this letter, _____
(name of FINANCIAL INSTITUTION) agrees to pay the sign-on and annual fee and commits to completing the necessary reporting for the Poseidon Principles on an annual basis, as outlined in the Technical Guidance and Governance Rules.
